ABOUT ME

Frontend Developer with 3 years of experience building fast, scalable, and performance-optimized web experiences using modern frameworks and clean architecture. Focused on crafting responsive, user-friendly interfaces and solving real-world problems through clean, efficient code. Currently expanding into AWS cloud services and exploring AI-powered development workflows, leveraging advanced prompting techniques to write smarter, faster, and more efficient solutions while continuously improving performance, scalability, and developer productivity.

EDUCATION

Bachelor of Computer Applications (9.20 CGPA)

Gujarat University

2023

Ahmedabad

SKILLS

Frontend & Core Web

Next.js, React, JavaScript (ES6+), Typescript, Remix, Sveltejs, HTML5, CSS3, Tailwind CSS, Responsive Design, Pixel-Perfect UI, bootstrap, Code splitting, Lazy loading, pixel perfect design, MUI(Material UI), Shadcn, Chakra UI, ANTD, framer motion, gsap, server side rendering, BetterAuth, OAuth, Clerk Authentication, Redux toolkit, Zustand,

Performance & Optimization

Lighthouse Optimization, Lazy Loading, Code Splitting, Caching Strategies, Asset Optimization

API & Data Integration

RESTful APIs, GraphQL, Axios, Fetch API, Authentication & Role-Based Access Control, CRUD Operations & Dynamic Data Handling

Real-Time & Advanced UI

RESTful APIs, GraphQL, Codegen, Axios, Fetch API, Authentication & Role-Based Access Control, CRUD Operations & Dynamic Data Handling

Dev Tools & Workflow

Git, GitHub, NPM, Webpack, Babel, CI/CD Pipelines (multi-environment deployments), Scrum Methodology, Production Debugging & Performance Profiling

Backend Exposure (Supporting Role)

Node.js, Basic understanding of database interactions & efficient data handling

Cloud & Deployment (Learning + Exploring)

AWS (EC2, S3, IAM), Hostinger, Vercel, Render, Nginx Configuration, CI/CD Pipelines, Environment Management (Dev, Staging, Production)

WORK EXPERIENCE

SoftColon Technology Private Limited

Frontend developer

(Present) Feb-2023

Ahmedabad

Infraveo Technologies Private Limited

Frontend intern (Reactjs)

Aug 2022 - Jan 2023

Ahmedabad

ACHIEVEMENTS

Designer & Developer of the Year

Awarded Designer & Developer of the Year (2025) at SoftColon Technology Private Limited for outstanding performance and innovation

PROJECTS

ATOMZ (No-Code Web Builder)

Tech Stack: React, Remix, TypeScript, Axios, REST APIs, Server-Side Rendering (SSR)

- Developed a dynamic no-code web builder enabling users to create nested UI components with preview functionality.
- Implemented **recursive component rendering in React** to support element-within-element architecture for flexible page structuring.
- Managed complex state architecture for **dynamic component trees**, live updates, and configuration persistence.
- Integrated server-side API rendering using Remix for improved performance and **SEO optimization**.
- Built scalable REST API integrations using Axios for data synchronization and backend communication.
- Optimized rendering performance and ensured smooth user experience across large component hierarchies.

Employee Shift Management System (LINE App + Admin Panel – Japan)

Tech Stack: React, TypeScript, REST APIs, Authentication, SCSS

- Developed a shift and workforce management application integrated with LINE, enabling employee **clock-in/clock-out, task start/stop tracking**, and work-proof uploads.
- Implemented secure **authentication flows, multipart form handling**, and dynamic task history management with real-time status updates.
- Built a **role-based** admin panel supporting user management, **multiple CRUD** operations, and time-based access control using reusable component architecture.
- Developed dashboards for managing future task assignments, monitoring completed work, **tracking payments**, and optimizing **complex state-driven** workflows for accurate time tracking.

Dynamic Form Builder & Response Management System

Tech Stack: React, TypeScript, React Hook Form, Zod, REST APIs, SCSS

- Developed a fully dynamic **multi-step form system** where administrators can create and manage **customizable questionnaires** with multiple input types, conditional logic, and **custom validation messages**.
- Implemented backend-driven form rendering using form IDs, ensuring complete TypeScript safety with reusable component architecture.
- Integrated React Hook Form with Zod schema validation for scalable, **high-performance form state management**.
- Built admin panels for **real-time form preview**, response management, and **submission tracking**.

Dating Platform (SvelteKit)

Tech Stack: SvelteKit, TypeScript, Socket.io, REST APIs, SCSS, Cloud Storage

- Developed a real-time matchmaking platform with **multi-panel architecture**, dynamic user flows, and compatibility-based profile discovery.
- Engineered WebSocket-powered **chat interfaces** with live presence tracking for seamless real-time communication.
- Optimized high-resolution image delivery using lazy loading, compression, and efficient asset handling while ensuring responsive, high-performance UI across devices and browsers.

Chrome Extensions

Tech Stack: Chrome Extension APIs, Better Auth, REST APIs, Gemini AI, JavaScript

- Developed and deployed multiple Chrome extensions including **AI-powered Text Rewriter**, **CORS Unblocker**, Color Enhancer, and Keyboard Navigation tools.
- Engineered **secure authentication** and full **CRUD workflows** using Better Auth with RESTful architecture in Next.js.
- Integrated Gemini AI for intelligent text enhancement and built optimized UI, background scripts, and landing pages for seamless browser performance.

ATZ AI – Marketing Automation Platform

Tech Stack: React, Next.js, Stripe, Socket.io, i18n

- Developed campaign automation dashboards with subscription management and real-time communication modules.
- Implemented multilingual UI support and dynamic SEO rendering for global reach.
- Integrated REST APIs and optimized frontend performance for production environments.
